PROFESSIONAL SUMMARY

Software Engineer with **4 years** of progressive experience building, shipping, and optimizing cross-platform mobile applications in **Flutter & Dart**, accompanied by scalable distributed backend systems. Delivered commercial production applications across FinTech, EdTech, CRM, and Health industries. Deep technical expertise in Clean Architecture, BLoC, Riverpod, offline-first architectures (Drift, SQLite), real-time WebSockets, and performance profiling. Transitioned into high-load systems engineering at OSNOVA, supporting **1,500+ RPS** with Go, Redis Stack, and MongoDB change streams. Fluent in English (B2).

TECHNICAL SKILLS

- Mobile Engineering:** Flutter, Dart, Android SDK (Kotlin/Java), iOS SDK (Swift), Platform Channels, Clean Architecture, BLoC, Riverpod, Provider, Custom Animations
- Data & Architecture:** Offline-First Design, Drift, SQLite, Hive, WebSockets, RESTful APIs, gRPC, Background Tasks, Biometrics, Secure Storage
- Backend & Systems:** Go (Golang), Redis Stack (Query Engine), MongoDB (Change Streams), PostgreSQL, Nginx (upstream keepalive, buffer logging)
- Quality & Tooling:** Dart DevTools Profiling, Unit & Widget Testing, Mockito, Git, GitHub Actions CI/CD, Fastlane, Docker, App Store & Google Play Publishing

PROFESSIONAL EXPERIENCE

Software Engineer (Backend & Client Infrastructure) OSNOVA · EdTech & High-Concurrency Systems		Jan 2025 — Present Tashkent, Uzbekistan
- Architected and scaled client sync infrastructure and Go backend services supporting 1,500+ requests per second (RPS) during peak nationwide exam sessions. - Engineered a hybrid cache/query architecture on Redis Stack synchronized via MongoDB Change Streams, reducing mobile data query latency by 65%. - Configured Nginx upstream keepalive connection pooling, eliminating TCP handshakes under high concurrency and cutting mobile API latency by 35%. - Integrated resilient WebSocket connections with automatic reconnection strategies and heartbeats to ensure zero packet loss during live classroom interactions.		
Software Engineer (Mobile) Mom+ · Health & Family Platform		Aug 2024 — Dec 2024 Tashkent, Uzbekistan
- Led performance optimization and UI responsiveness for a health and parenting mobile app in Flutter. - Conducted in-depth memory and rendering profiling via Dart DevTools, reducing UI frame jank by 40% and trimming RAM footprint by 35% across lower-end Android hardware. - Refactored state management to Riverpod, eliminating unnecessary widget build cascades in complex dynamic forms.		
Software Engineer (Mobile) Napa Team · Software Development		Feb 2024 — Jul 2024 Tashkent, Uzbekistan
- Architected and developed modular Flutter mobile applications adhering strictly to Feature-First Clean Architecture. - Standardized shared UI component libraries and internal packages, accelerating cross-team feature delivery by 25%. - Engineered custom platform channels in Kotlin and Swift for hardware sensors, background fetch, and native camera interactions.		
Software Engineer (Mobile) Modme · Educational CRM & ERP		Sep 2023 — Jan 2024 Tashkent, Uzbekistan
- Engineered real-time mobile CRM features for educational administrators, educators, and students. - Implemented high-concurrency WebSockets for instant messaging, attendance synchronization, and live push notifications. - Built an offline-first data persistence architecture using SQLite & Drift, enabling uninterrupted offline operation with automatic sync upon reconnection.		
Software Engineer (Mobile — Remote) NEO Insurance · FinTech / InsurTech		Mar 2023 — Aug 2023 Remote
- Built a high-converting digital insurance mobile app in Flutter, handling policy calculation, payment, and instant claim filing. - Integrated multi-provider payment gateways (Click, Payme, Stripe) and biometric authentication (FaceID/Fingerprint), lifting policy checkout conversion by 28%. - Constructed multi-step policy purchase forms with automated client-side validation and encrypted storage (Flutter Secure Storage).		
Software Engineer (Mobile) IT Park / Tech Hub		Mar 2022 — Feb 2023 Tashkent, Uzbekistan
- Developed cross-platform mobile features and custom UI components for community and social networking applications in Flutter. - Integrated RESTful API services with JWT token refresh lifecycles and secure encrypted local storage. - Wrote unit and widget test suites, raising code coverage across core feature modules to 75%+.		
EDUCATION & CREDENTIALS		LANGUAGES
Specialized Secondary / Computer Science Foundations Tashkent, Uzbekistan Continuous certification in Distributed Systems & Mobile Architecture		English: B2 — Upper Intermediate (Professional Working) Uzbek: Native Russian: Working Proficiency
