

Azizbek Xoliqov

Software Engineer (Full-Stack)

 Tashkent, Uzbekistan (Open to Remote / Relocation)  +998 (70) 0100076  mail@xlkv.me  xlkv.me

 github.com/xlkv  @xalkv

PROFESSIONAL SUMMARY

Software Engineer with **4 years** of experience delivering high-impact end-to-end digital products, bridging cross-platform mobile applications in **Flutter & Dart** with high-concurrency backend services in **Go (Golang)**. Transitioned from comprehensive mobile client development across FinTech, CRM, and Health products into high-concurrency backend systems at OSNOVA sustaining **1,500+ requests per second (RPS)**. Deep technical expertise across in-memory indexing with **Redis Stack**, real-time database change streams with **MongoDB**, **Nginx** upstream TCP optimization, and offline-first mobile sync. Fluent in English (B2).

TECHNICAL SKILLS

- Frontend & Mobile:** Flutter, Dart, Android & iOS SDKs, Clean Architecture, BLoC, Riverpod, Offline-first, Drift, SQLite, Hive, Responsive UI
- Backend & Systems:** Go (Golang), REST APIs, gRPC, Protobuf, WebSockets, Goroutines, Channels, Worker Pools, Microservices
- Databases & Caching:** Redis Stack (Query Engine & In-Memory Indexing), MongoDB (Change Streams / Watchers), PostgreSQL, Data Modeling
- DevOps & Tooling:** Nginx (Upstream Keepalive Pooling, Buffer Logging), Docker, Docker Compose, RabbitMQ, Git, CI/CD, Linux

PROFESSIONAL EXPERIENCE

Software Engineer (Backend & Systems) OSNOVA · EdTech & High-Concurrency Systems	Jan 2025 — Present Tashkent, Uzbekistan
- Architected and delivered backend microservices in Go sustaining 1,500+ requests per second (RPS) during peak nationwide exams. - Engineered a hybrid synchronization layer: designed MongoDB Change Streams (Watchers) that capture writes and update Redis Stack Query Engine in near real-time (<10ms), reducing read latency by 65%. - Implemented Nginx upstream keepalive connection pooling, eliminating TCP handshakes for internal Go microservice communication and cutting overall system latency by 35%. - Configured Nginx buffer logging to protect disk I/O from being overwhelmed during heavy traffic spikes.	
Software Engineer (Mobile) Mom+ · Health & Family Platform	Aug 2024 — Dec 2024 Tashkent, Uzbekistan
- Led performance and memory profiling via Dart DevTools, reducing frame jank by 40% and memory usage by 35% on budget smartphones. - Refactored mobile state management to Riverpod, eliminating unnecessary widget build cascades in multi-step user forms.	
Software Engineer (Mobile) Napa Team · Software Development	Feb 2024 — Jul 2024 Tashkent, Uzbekistan
- Architected modular Flutter mobile applications adhering to Feature-First Clean Architecture and standardized design tokens. - Engineered native platform channels in Kotlin and Swift for hardware integrations and background tasks.	
Software Engineer (Mobile) Modme · Educational CRM & ERP	Sep 2023 — Jan 2024 Tashkent, Uzbekistan
- Developed real-time mobile CRM features for educators and students with live messaging and attendance tracking via WebSockets. - Engineered offline-first persistence with SQLite/Drift, enabling uninterrupted workflows during network dropouts.	
Software Engineer (Mobile — Remote) NEO Insurance · FinTech / InsurTech	Mar 2023 — Aug 2023 Remote
- Developed cross-platform mobile client in Flutter with biometric authentication and payment gateways (Click, Payme, Stripe), lifting conversions by 28%. - Constructed end-to-end checkout flows with client-side validation and encrypted local token storage.	
Software Engineer (Mobile) IT Park / Tech Hub	Mar 2022 — Feb 2023 Tashkent, Uzbekistan
- Built dynamic mobile interfaces in Flutter connected to RESTful microservices with JWT authentication. - Wrote comprehensive unit and widget tests, achieving 75%+ test coverage across core feature modules.	

EDUCATION & CREDENTIALS

Specialized Secondary / Computer Science Foundations
Tashkent, Uzbekistan
Continuous learning in Full-Stack Architecture, Distributed Systems & Mobile
